

**EMBO Membership Pocket Guide 2012**

# EMBO Membership Pocket Guide

**2012**

EMBO elects new members annually on the basis of scientific excellence. Membership is a life-long honour and a tribute to the key research carried out by these scientists. The EMBO Members provide valuable scientific input to the organization and their collective standing is the basis of EMBO's international reputation.

This booklet is a condensed version of the EMBO Membership List 2012. It lists the 1,541 current EMBO Members by name (including the contributions they have made to EMBO as officers or committee members), by their current country and city of residence, and by their association with one or more of the 19 broad scientific subject areas that EMBO uses to categorize its activities.

A searchable database with specific keywords is available online at

**[www.embo.org/embo-members/find-a-member.html](http://www.embo.org/embo-members/find-a-member.html)**

# EMBO Members & Associate Members

*by subject area*

Each EMBO Member has been assigned up to three subject areas, which serve to divide the EMBO “academy” in 19 virtual “faculties” representing the broad scientific interests of its members:

Cell Cycle

Cell & Tissue Architecture

Cellular Metabolism

Chromatin & Transcription

Development

Differentiation & Death

Genome Stability & Dynamics

Genomic & Computational Biology

Immunology

Membranes & Transport

Microbiology, Virology & Pathogens

Molecular Medicine

Neuroscience

Plant Biology

Proteins & Biochemistry

RNA

Signal Transduction

Structural Biology & Biophysics

Systems Biology
