

EMBO Young Investigator networking categories and guidelines:

	current programme members	"former" programme members
Institute visits, seminar talks etc	✓	●
Joint group meetings	✓	●
Sectoral Meetings	✓	✓
Conference /Meeting Support	✓*	
Student Exchanges	✓	●
Local PhD Courses	✓	●
Meeting Grants	✓*	

● = when at least one "current" programme member involved

* = including Young Investigators who are in their first year as "former" programme members

YIP institute visits, seminar talks etc:

Travel and accommodation costs for programme members invited to give a seminar/plan a collaboration with another programme member is covered to an amount up to €500. (One current programme member needs to be involved).

Joint group meetings:

Joint group meetings between programme members' groups are supported with a maximum of €800 per group. Claims will be reimbursed after the event. (One current programme member needs to be involved)

YIP sectoral meetings:

Sectoral meetings will be supported with €600 per participating programme member, both former and present. An additional €200 is available for participating lab members, i.e. the maximum available sum per programme member is €800. Rather than being allocated to the costs of each individual participant, the total amount of support can be spent as a central "pot" for costs of the meeting - hotel, travel, food, room hire etc. An 80% deposit can be paid to help secure hotel reservations etc. Ideally, organisers should provide EMBO with either the invoices & receipts for all costs relating to the meeting, or an invoice from the host institute to whom we would be paying the reimbursement (this invoice should contain a breakdown of the costs). However, we realize that these may not be easy to arrange – especially where an advance payment is made to cover some of the costs. If this is the case, please contact yip@embo.org for advice.

Conference/meeting support:

Scientific meetings organized by programme members that address to a large part the younger scientific community can be supported with up to €5000. Other scientific meetings organized by current programme members can be supported with up to €3000. The support may be used to cover room rental, accommodation, travel, meals, etc. We cannot support secretarial assistance. If necessary the grant can be paid in advance.

Student visits:

Travel and accommodation costs for students who are going to other programme members to carry out experiments can be covered up to a maximum of €1500. Travel and accommodation costs should be kept to a minimum. Students staying longer than a few days are expected to find cheap accommodation; hotel rates will not be covered. For all exchanges it is expected that the best travel and accommodation fares be sought. EMBO YIP will not contribute to bench fees. (One current programme member needs to be involved in the interaction)

Support for local PhD courses:

Programme members who are organizing a PhD course in their local institutes can receive support for travel and accommodation for lectures/teaching support of up to two programme members per year, EMBO will cover up to €500 per person. (One current programme member needs to be involved in the interaction)

Meeting grants:

Meeting grants support you or your group members attending scientific conferences or courses. The grant can be used to cover registration, travel and accommodation for the participant (max 500 euros within Europe, 1000 euros overseas). A maximum of €1000 is reserved per member per year. To request the support the group leader should fill in part A of the form. The YIP office will notify you of the acceptance of the request. After the conference, the lab member who attended the conference should fill section B, writing a short report on the conference (max 150 words), tick whether they presented a poster or not, add the amount requested including bank details and attach the relevant receipts. If necessary the grant can be paid in advance.
