

Course Preparation :

- A 20 min (plus 10 minutes discussion) presentation of your assigned paper. Please contact the Young Investigator leading your session beforehand for further details regarding the form and content of the presentation and discussion. Preferred format is PowerPoint. Please send the presentation via email to the office before the start of the meeting. Laptops cannot be accommodated.

- Prepare **either** :

I.

A paper writing exercise - Students should write up their poster in the form of a primary research manuscript. The manuscript should be limited to 3000 words and 3 figures, adhering to a modified Current Biology Reports format.

OR**II.**

An independent research proposal - Students are asked to write a research proposal unrelated to their current research. The aim of this exercise is to prepare students for writing a fellowship proposal. The proposal is limited to 2000 words and may not include figure or tables.

- Read the papers relevant for your session and other sessions that you are interested in.
- A 1m x 1m poster about your research and three slides for a 3 minute presentation of your poster.
- Think of questions for the tutorials that you are attending.
- Send an abstract of your research of no more than 100 words for the abstract book.
- Send an electronic photograph of yourself (4cm x 3 cm) for the same purpose.
